

Spice it up!

# Innovative Activities for your Class

IX Seminar for English Teaching Professionals

August 23<sup>rd</sup>, 2025

## Plenary:

### AI unleashed: Find a Unique Ally in ChatGPT

**PEARSON Academic Consultant, Brenda Pineda**

August 23rd, 2:00 pm

# Agenda

- ✓ Basics & Reflection: AI in education (15 min)
- ✓ AI: Scope and limitations (45 min)
- ✓ Plagiarism & misuse (10min)
- ✓ Final task: your ideas (10 min)

# Basics & Reflection: AI in education

*Brainstorming to start:*

- **3 concepts** *you've learnt about AI*
- **2 feelings** *about AI*
- **1 idea/** *something you'd like to **learn** today*

Go to [menti.com](https://www.menti.com)

# Let's start with a definition:

**Artificial Intelligence** is the process of building **intelligent machines** from vast volumes of **data** which can perform **human-like tasks**.

It **enhances** the speed, precision, and effectiveness of **human efforts**.

# GenAI

Generative AI, which stands for Generative Artificial Intelligence, is a type of AI system that is specifically designed to **create new content, such as text, images, audio, or videos**, without the need for explicit programming. The AI works by learning patterns and structures from existing data and then uses that knowledge to generate fresh and original content.

(OpenAI, 2023)

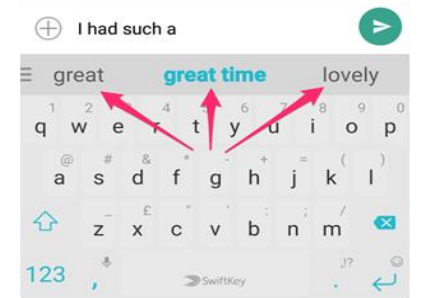

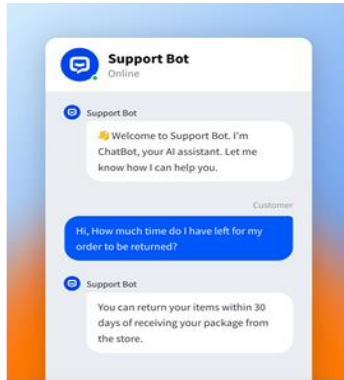

# AI as we know it

Deep Learning  
(Generative AI)

AI is only as powerful as the instructions you give it. This means you need to

- a) have proficient **knowledge** around what you **need**,
- b) **clarify your thinking** so you understand specifically what you're asking for,
- c) have the ability to **draw abstract connections** between ideas and then **verbalize what you want** the outcome of the synthesis between abstract ideas to be, and
- d) be able to effectively **write clear & concise prompts** that "train" AI to "do the doing" for you.

- Fitzpatrick , Dan; Fox, Amanda; Weinstein, Brad. The AI Classroom: The Ultimate Guide to Artificial Intelligence in Education (The Hitchhiker's Guide for Educators Series Book 3) (p. 92). TeacherGoals Publishing. Kindle Edition.

# AI in education:

**Advantages?  
Opportunities?**

**Limitations?  
Potential risks?**

**Let's work in  
groups of three and  
share**

**Spice it up!**

**Innovative Activities  
for your Class**

# AI:

## Scope and limitations

### Scope

1

Simple, intuitive and flexible access.

2

Provides info, recommendations and personalised assistance.

3

It can generate texts, images, questions, problems.

4

It can translate texts and create programming codes.

Derechos reservados por Pearson

# AI: Scope and limitations

## Limitations

1

### Misinformation

2

### Inaccuracies and hallucinations

It may present inaccuracies in certain fields or specific domains, such as a branch of medicine or the history of a small town.

3

### Discrimination and bias

It may present various types of biases that do not represent a multiplicity of viewpoints and aspects, and it may even reproduce stereotypes.

4

### It doesn't feel emotions or reason

Even though it might seem like it does.

5

### Complete understanding

Fully grasping the context or intention.

6

### Giving advice

Providing legal, medical, or financial advice.

# Enhancing the teaching practice

Ideas and content recommendations for planning and resources.

Design of lesson planning and teaching materials.

Adaptation and customization of teaching materials (level, diagnostics, accessibility).

Feedback and systematization of data about students' performance

Assessment: assessment criteria, personalized evaluations, results analysis.

Facilitating innovation: ideas for community projects, cross-curricular projects.

# Some GenAI tools

## CHATBOTS

**CLAUDE**  
Anthropic  
General purpose assistant  
*Free version and paid version available*  
<https://claude.ai>

**CHATGPT**  
OpenAI  
General purpose assistant  
*Free version and paid version available*  
<https://chatgpt.com>

**GEMINI**  
Google  
General purpose assistant  
*Free version and paid version available*  
<https://gemini.google.com>

**PERPLEXITY**  
Perplexity AI  
Research and answer engine  
*Free version and paid version available*  
<https://www.perplexity.ai>

## IMAGE GENERATION

**MIDJOURNEY**  
Midjourney  
Image generation via Discord  
*Free version and paid version available*  
<https://midjourney.com>

**CRAIYON**  
Craiyon  
Image generation, web-based  
*Free version and paid version available*  
<https://www.craiyon.com>

**PLAYGROUND**  
Playground AI  
Image generation, web-based  
*Free version and paid version available*  
<https://playground.com>

**IDEOGRAM**  
Ideogram AI  
Image generation, web-based  
*Free version and paid version available*  
<https://ideogram.ai>

# Here are some examples

# Hands-on activity

**Work in pairs.**

- 1. Choose an AI tool.**
- 2. Design an activity that enhances institutional management, enriches teaching practices, or supports students in their learning by interacting with the selected tool.**
- 3. Share your ideas.**

# Plegarism and Misuse

Spice it up!

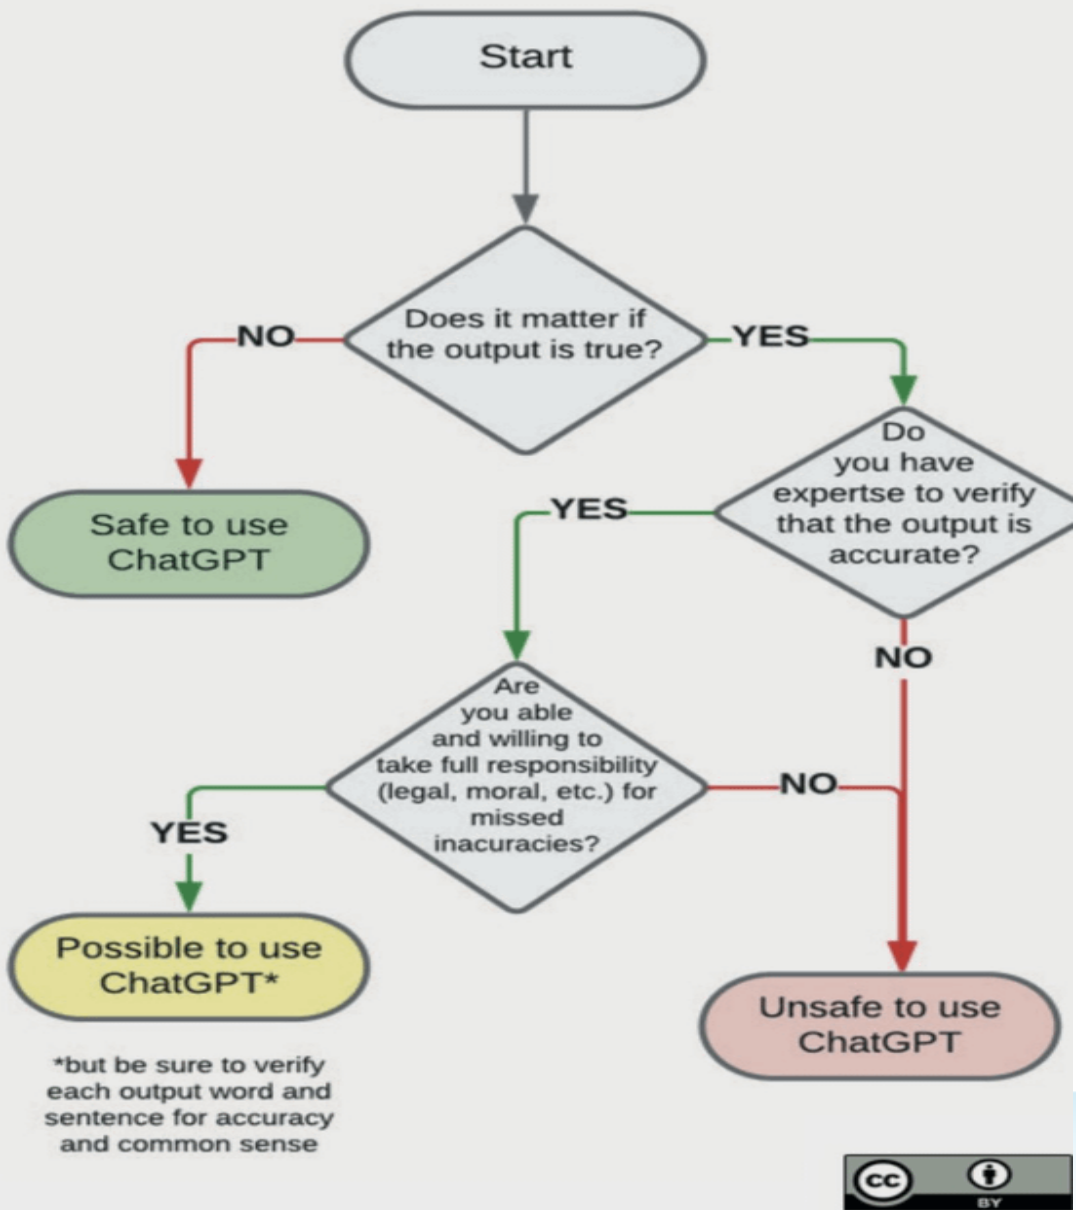

**Innovative Activities  
for your Class**

Figure 1: When is it safe to use ChatGPT?<sup>5</sup>

# Decision Tree:

To chat or not  
To chat...

That's the  
question

# Human-in-the-loop

1

## Educating & raising awareness

Foster the importance on quoting and skill-development.

2

## Developing critical & creative thinking

Challenge ideas from the chat

3

## Rethinking activities & redesigning assessment

What do you focus on? Process or Product?

4

## Setting up rules

Asking for additional ideas or points of view to write. Debating.

5

## Supervising use

Students can engage in conversations to practise their English skills. They can also ask the chat to correct their mistakes.

**We need to find some balance.**

**There is little evidence that humans are likely to quickly change their learning habits, even as technology rapidly advances. Humans are accustomed to learning from other humans.**

**Mike Mayor**  
**Pearson GSE, Senior Director**

Quoting Asher and Kantt 2024  
At TESOL Colombia

Thank You

Human force will never be replaced.
